DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities:

In the specification, page 1, under the heading of RELATED APPLICATION, please insert the US Pat. 6,635,834 and 6,846,994 for the Application Numbers 09/955,160 and 10/664,778, respectively.

Appropriate correction is required.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-26 and 54 are drawn to pH sensitive delay activated switching device classified in class 200, subclass 61.04.

II. Claims 27-54 are, drawn to delay activation device within a living organism classified in class 600, subclass 340+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown

Art Unit: 2832

to be separately usable. In the instant case, invention I has separate utility such as a gas or a fuel sensor. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2832

6. Claims 27-54 are rejected under 35 U.S.C. 102(b) as being anticipated by Iddan US Pat. 5,604,531 (as provided by the Applicant). Iddan discloses a delay activating switch device as claimed. An endoscopic device is swallowed by a patient, the device takes pictures along the canal and transmitting to a receiver. Iddan discloses the device is battery powered.

Allowable Subject Matter

7. Claims 1-26 and 54 are allowed over the prior art of record.

Current invention teaches a pH sensitive delay activated switch device having a restraining component. Claimed switch device, in combination with claimed limitations of base claim are neither disclose nor suggested by the prior art of record.
